PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student passionate about Software Engineering with a strong interest in Backend Development. Skilled in Java, Python, SQL, Spring Boot, and REST APIs, with foundational knowledge of Data Structures & Algorithms, DBMS, OOP, and Cloud Computing fundamentals. Experienced in developing academic and personal projects that demonstrate problem-solving and programming abilities. A quick learner with a growth mindset, seeking a Software Engineering internship to apply technical skills, gain industry experience, and contribute to building scalable and efficient software solutions.

EDUCATION

AVN Institute of Engineering and Technology

Bachelor of Technology in computer Science and Engineering

St Mary's Centenary Junior College

Intermediate in Mathematics, Physics, and Chemistry

Rangareddy, Telangana

Aug 2023 – Present

Hyderabad

Sep 2021 – May 2023

ACADEMIC PROJECTS AND HACKATHONS

Mythical Guild – Web-Based Gaming Community Platform

- Developed a web platform for gamers to create and manage guild communities.
- Implemented features such as user registration, guild creation, and member communication.
- Focused on backend development, business logic, and database management.
- Designed a user-friendly interface to support community collaboration and engagement.

Claim Watch AI – Insurance Fraud Detection Platform

- Developed a machine learning-based system to detect fraudulent insurance claims using historical claim data.
- Implemented data preprocessing, feature extraction, and classification algorithms for fraud detection.
- Automated fraud analysis for large insurance datasets to improve detection efficiency.
- Built using Python, Pandas, NumPy, and Scikit-learn.

AI-Powered Seasonal Disease Predictor and medication recommender

- Developed a hybrid machine learning system for seasonal disease prediction using symptom, weather, season, and location data.
- Implemented data preprocessing, feature engineering, and model training using Random Forest and XGBoost classifiers.
- Applied ensemble learning, hyperparameter tuning, and cross-validation to improve prediction accuracy and model generalization.
- Integrated a medication recommendation module to provide disease-specific treatment suggestions and health insights.
- Developed using Python, Pandas, Scikit-learn, XGBoost, and Machine Learning techniques.

Pneumonia Detection Using CNN

- Built a deep learning model using Convolutional Neural Networks (CNNs) to detect pneumonia from chest X-ray images.
- Applied image preprocessing and data augmentation techniques to improve model accuracy.
- Evaluated model performance using accuracy and loss metrics.
- Implemented using Python, TensorFlow/Keras, OpenCV, and Deep Learning frameworks.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, C

Backend Development: Spring Boot, REST APIs, Object-Oriented Programming (OOP)

Python Technologies: Pandas, NumPy, Scikit-learn, TensorFlow, Keras

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL, DBMS

Computer Science Fundamentals: Data Structures & Algorithms, Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Postman

Cloud Fundamentals: Cloud Computing Basics, AWS Fundamentals
